Brannon Myrick, DMD, MD

Oral & Maxillofacial Surgeon

Dr. Myrick became an oral surgeon because it allows him to work with his hands while making an immediate, direct impact on his patients' well-being. He strongly believes that communication is the key to helping patients feel more comfortable. He practices empathy with his patients and listens when patients vocalize any concerns. There is no one size fits all when it comes to patient care, and Dr. Myrick treats each patient as an individual to better serve their exact needs.
